Selected relevant project experience _____

Vergin Media O2

Telecom Industry

Vergin Media O2

focused on improving the sales, customer services and billing domains across all front-line channels as well as focusing on providing all the back-end capability to manage - order management, supply chain and provisioning to enable omni-channel customer management. This is being achieved by implementing an out of the box NetCracker suite of applications called: Netcracker Telecommunications Stack (also referred to in this document as NC BSS). The aim of this platform is to enable the operator to become a Digital Service provider (DSP).
